Our goal is to help underserved high school students, especially from rural and government schools, gain admission to IITs and other top colleges in India. We achieve this by working closely with students to help them master mathematics, physics, and chemistry, providing them with a solid foundation for their future career aspirations. We aim to keep tuition fees affordable for students from rural and government schools so that they, too, can access quality coaching and secure placements in the colleges of their choice.

We provide the following services:

- Special coaching sessions in mathematics, physics, and chemistry.
- Coaching on learning strategies and practice sessions.
- A very affordable cost to students.

For additional information about the program and the admissions process, please reach out to us:

Our classes are conducted by qualified instructors with advanced degrees.

Dr. Mohan Venkataramana is a serial entrepreneur and President of Syntonix Inc. He is a graduate of IIT Madras (B.Tech in Chemical Engineering), the University of Illinois (M.S. in Energy Engineering), and MIT (Ph.D, Chemical Engineering). He also worked at AT&T Bell Laboratories, Microsoft, Amazon, Caltech, and the Fred Hutchinson Cancer Research Center.

Praveen Venkataramana is the CEO of MITEG Corp and a graduate of MIT (B.S.) and Caltech (M.S.) in Mathematics.

Approach:

To be considered for the coaching program, students must submit a recommendation from a mathematics or science teacher at their school. Please click the APPLY link here or contact us for more information on admission requirements.

The coaching session will span 32 weeks, with students attending three hours of class each week per subject. This includes a one-hour online examination. This schedule will continue for the entire duration, thoroughly covering all subjects.
